Framework: Laravel, Flutter, React.js

EDUCATION

Bachelor of Computer Science (HONS.) Netcentric Computing
CGPA - 3.38

2022 - 2026
UiTM Jasin, Melaka

PROJECTS

NeighborHub Mobile Application  | [Flutter, Dart, Firebase](#)

2025

- Developed a comprehensive community management with responsive and beautiful UI using **Flutter** written in **Dart**, a better error handling, improving UI consistency and performance
- Developed a full backend API using **Node.js** and **Express.js**, featuring user authentication with **JWT tokens**, **postgreSQL** database integration via **prisma** ORM and **RESTful endpoints** for managing community events, announcement and emergency reports with geolocation tracking

Melaka Travel Recommendation System  | [Next.js, TypeScript, C++](#)

- Developed a comprehensive travel recommendation system for Melaka, Malaysia, featuring a C++ backend with MySQL database and RESTful API endpoints using the Crow framework, complemented by a modern Next.js frontend with interactive MapLibre GL mapping capabilities.

POSITION OF RESPONSIBILITY

Secretariat of the UiTM JASIN College Representative Committee

2023 - 2024

- Managing critical administrative functions and coordinating communication between student representatives and college administration.
- Orchestrated committee meetings, maintained official records, and facilitated the implementation of student-led initiatives with institutional policies and procedures.
